vena

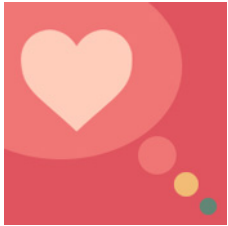

meet your own immunization assistant!

Vaccination is important, because 0-5 years old child's body are easily exposed to harmful material while their immune system not as reactive as adult's body. In contrast, most parents does not understand why, how, and when vaccination should be applied.

Vena helps parents to manage multiple vaccination schedule at the same time. It also maintain their children personal data such as name, birth date, gender, photos. These information would only be accessible from the specified phone. It has plan generator that enable parents to generate vaccination schedule automatically, if needed. based on the best practices. The schedule can be customized with children birth date and best frequency in giving vaccination. Instead of inserting the schedule manually, parents will be helped by the auto-generated schedule. Vena will always remind you for every vaccination schedule. Then parents will not miss any vaccination plan. The reminder period can be adjusted to parent requirements.

It is the easiest way to keep your kids vaccination schedule at you fingertip.

people you may like

valentine's day present!

Hey Singles!

Having a hard time looking for date?

In this Valentine's Day we are delighted to share an application that could help you find your true love

Yes, finding a buddy couldn't be easier. in association with NoLimit Indonesia, we would like to present an application called "People You May Like" . By providing your Facebook account, this application will recommend ten persons who could be your next partner based on your Facebook's social interaction.

oneclick

no more late, no more forget!

This application use some of the new features of latest Microsoft Mobile Operating System, which called "Mango". OneClick will be the first Windows Phone "Mango" app from Indonesian developer.

OneClick allows you to do what you need to do, timely. We believe there are many times that you in a situation like this : you have to finish something in a particular moment but you know that you're going to be tied up at that time.

Its when you required to give a confirmation call or text on certain day, when you have to send a time-sensitive email or when you want to wish or congratulate your loved ones via twitter or facebook but you are driving, in a meeting, or in a conference call.

OneClick provides you to set up your activity whenever you're idle, so later when you're occupied, completing your task is just one click away. This application supports sending text, sending mail, making phone call, updating twitter or facebook status. Enjoy!
